

ATOM[®]

ATOM

ATOM enables the landscape of the workplace to be brought together with one unifying family of products.

Unique in its adaptability, ATOM has been designed to respond to the way we interact with our working environments. Extensive, versatile and elegant - ATOM makes every space matter.

Modular

ATOM has been developed as a single seamless concept to deliver a holistic aesthetic, rather than being a collection of individual pieces defined by their modularity. Change is perpetual within dynamic working environments and so flexible, inclusive settings are essential in maximising employee effectiveness and wellbeing.

Organic, sculptural and intuitive - ATOM facilitates flexible working practices across modern businesses, allowing workplace designers to create a broad array of habitats from collaborative space for us to interact and exchange ideas, through to environments that support our individual focussed work.

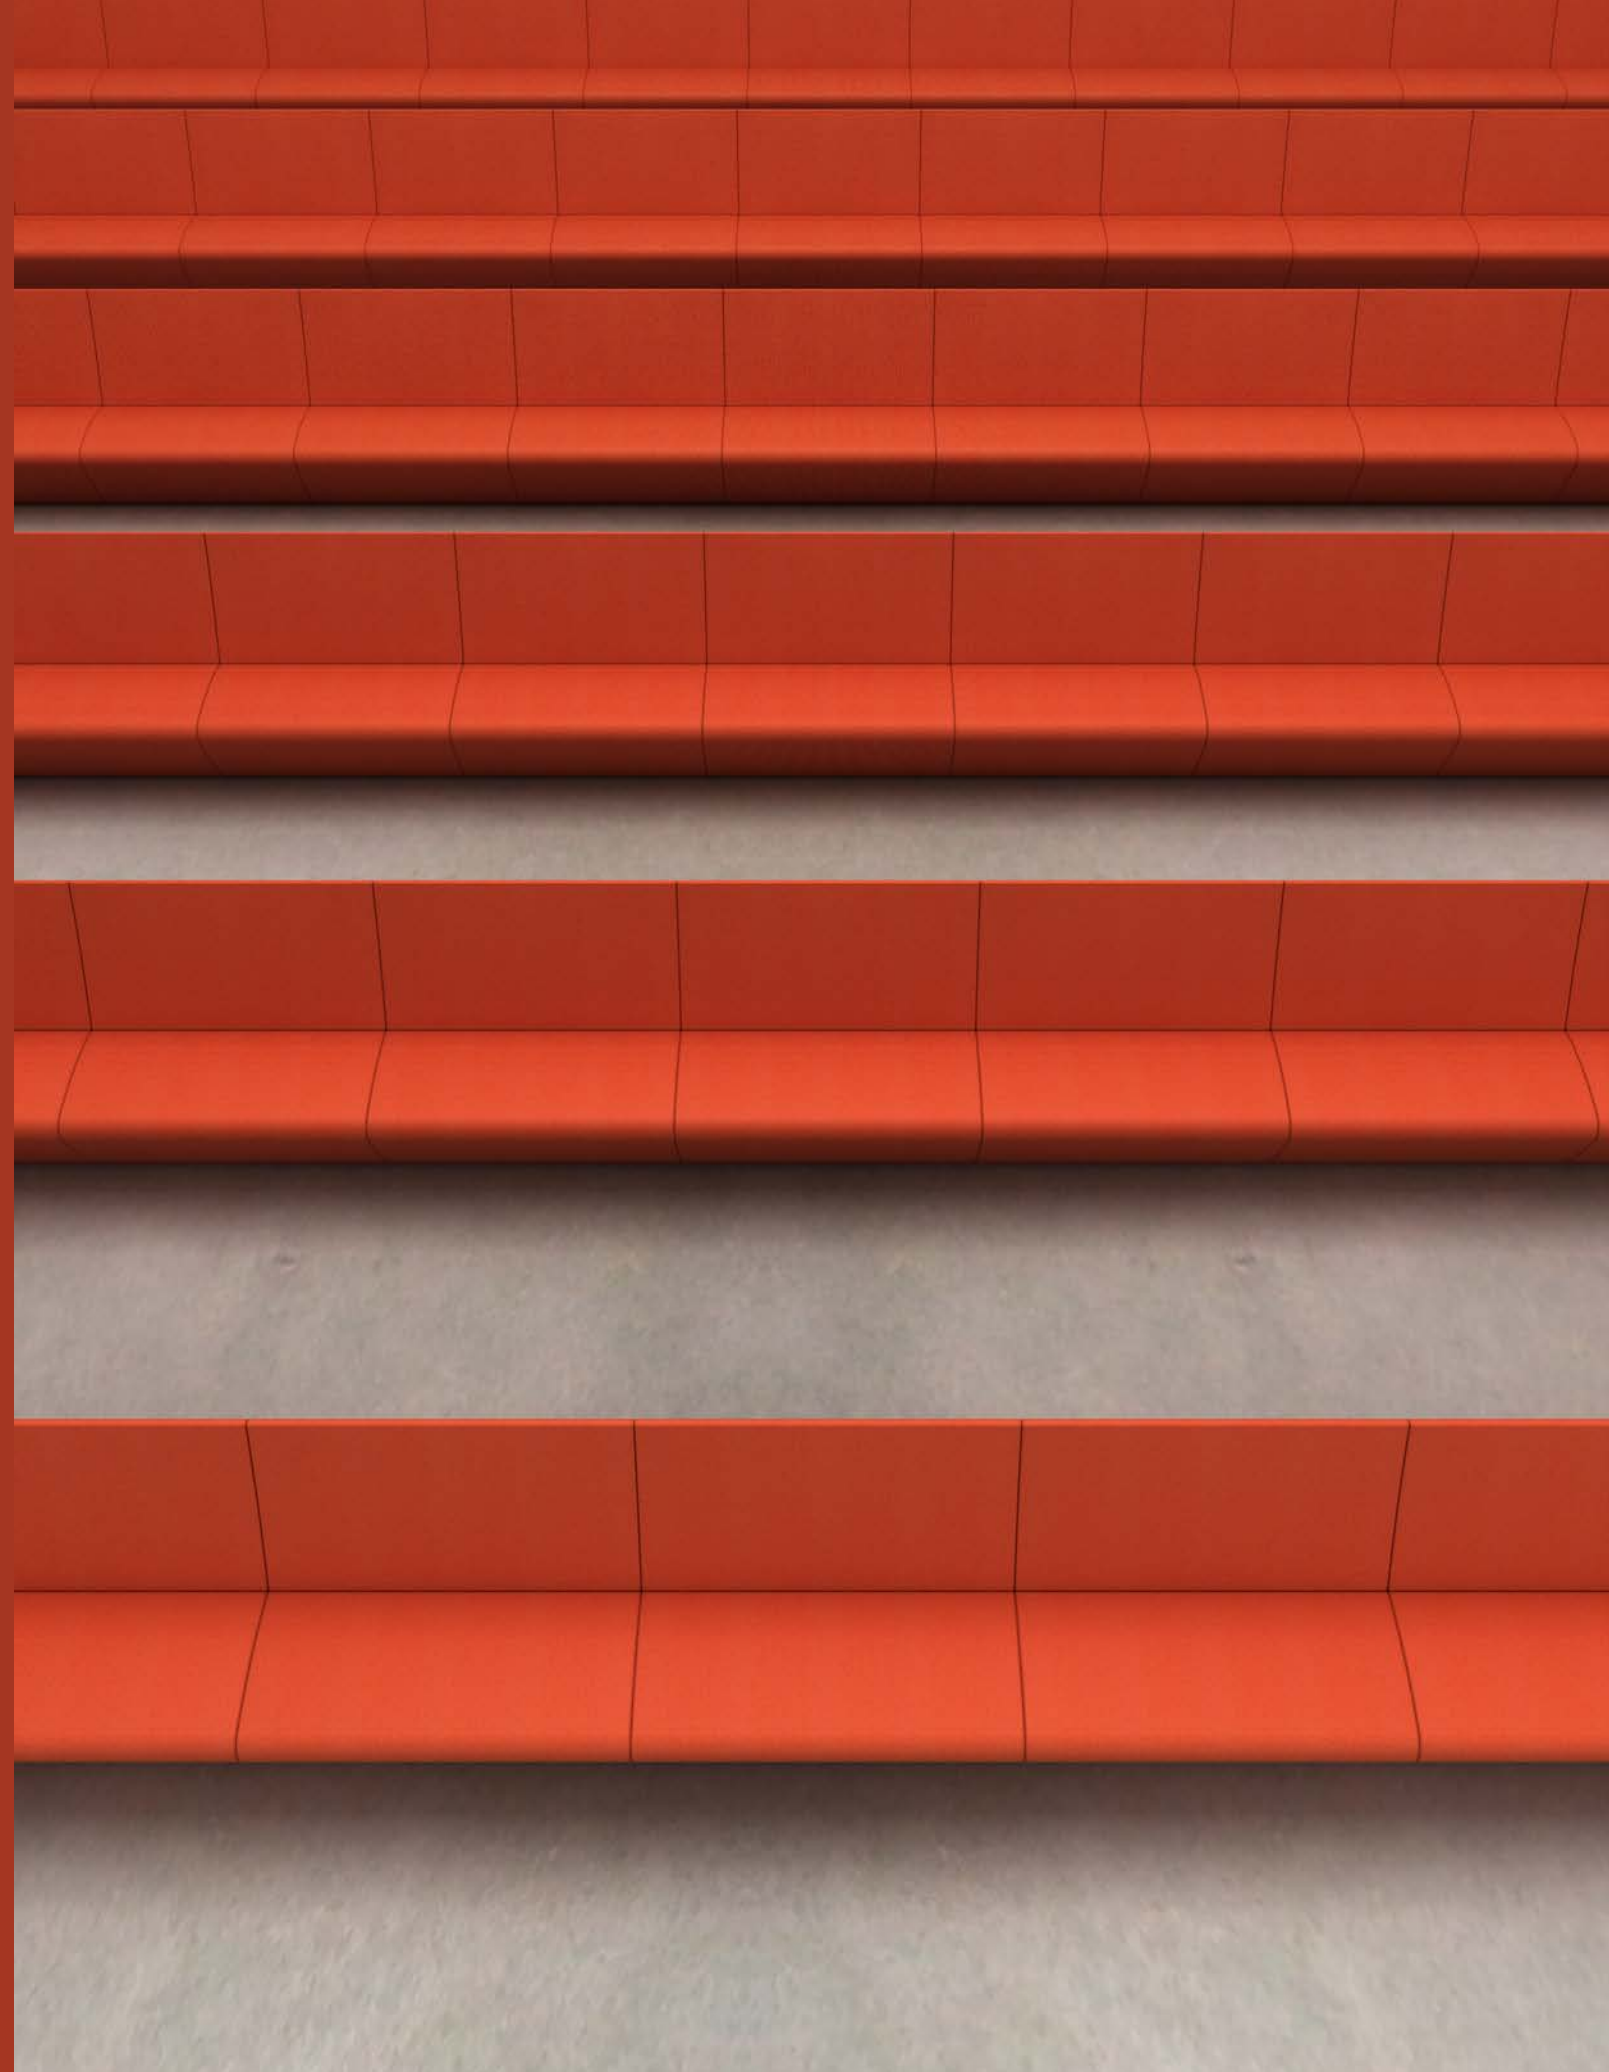

COMBINE

A wide-angle photograph of a modern airport lounge. The space is characterized by a curved ceiling with a grid of recessed lighting and a large wall of floor-to-ceiling windows on the left. The windows offer a view of an airport tarmac with a plane. In the foreground, there are several bright red, curved armchairs and a small black table. Further back, more seating and a few people are visible. The floor is highly reflective, mirroring the ceiling and windows. The word "SCULPTURAL" is overlaid in white, bold, sans-serif font on the right side of the image.

ATOM Table

The ATOM table system is logical and elegant in its simplicity - designed to work seamlessly with all elements of the ATOM upholstery collection. The versatile structure and refined aesthetic allows it to successfully fulfil the complete spectrum of requirements, from café and refectory tables to individual desks, workbenches, boardrooms and meeting tables.

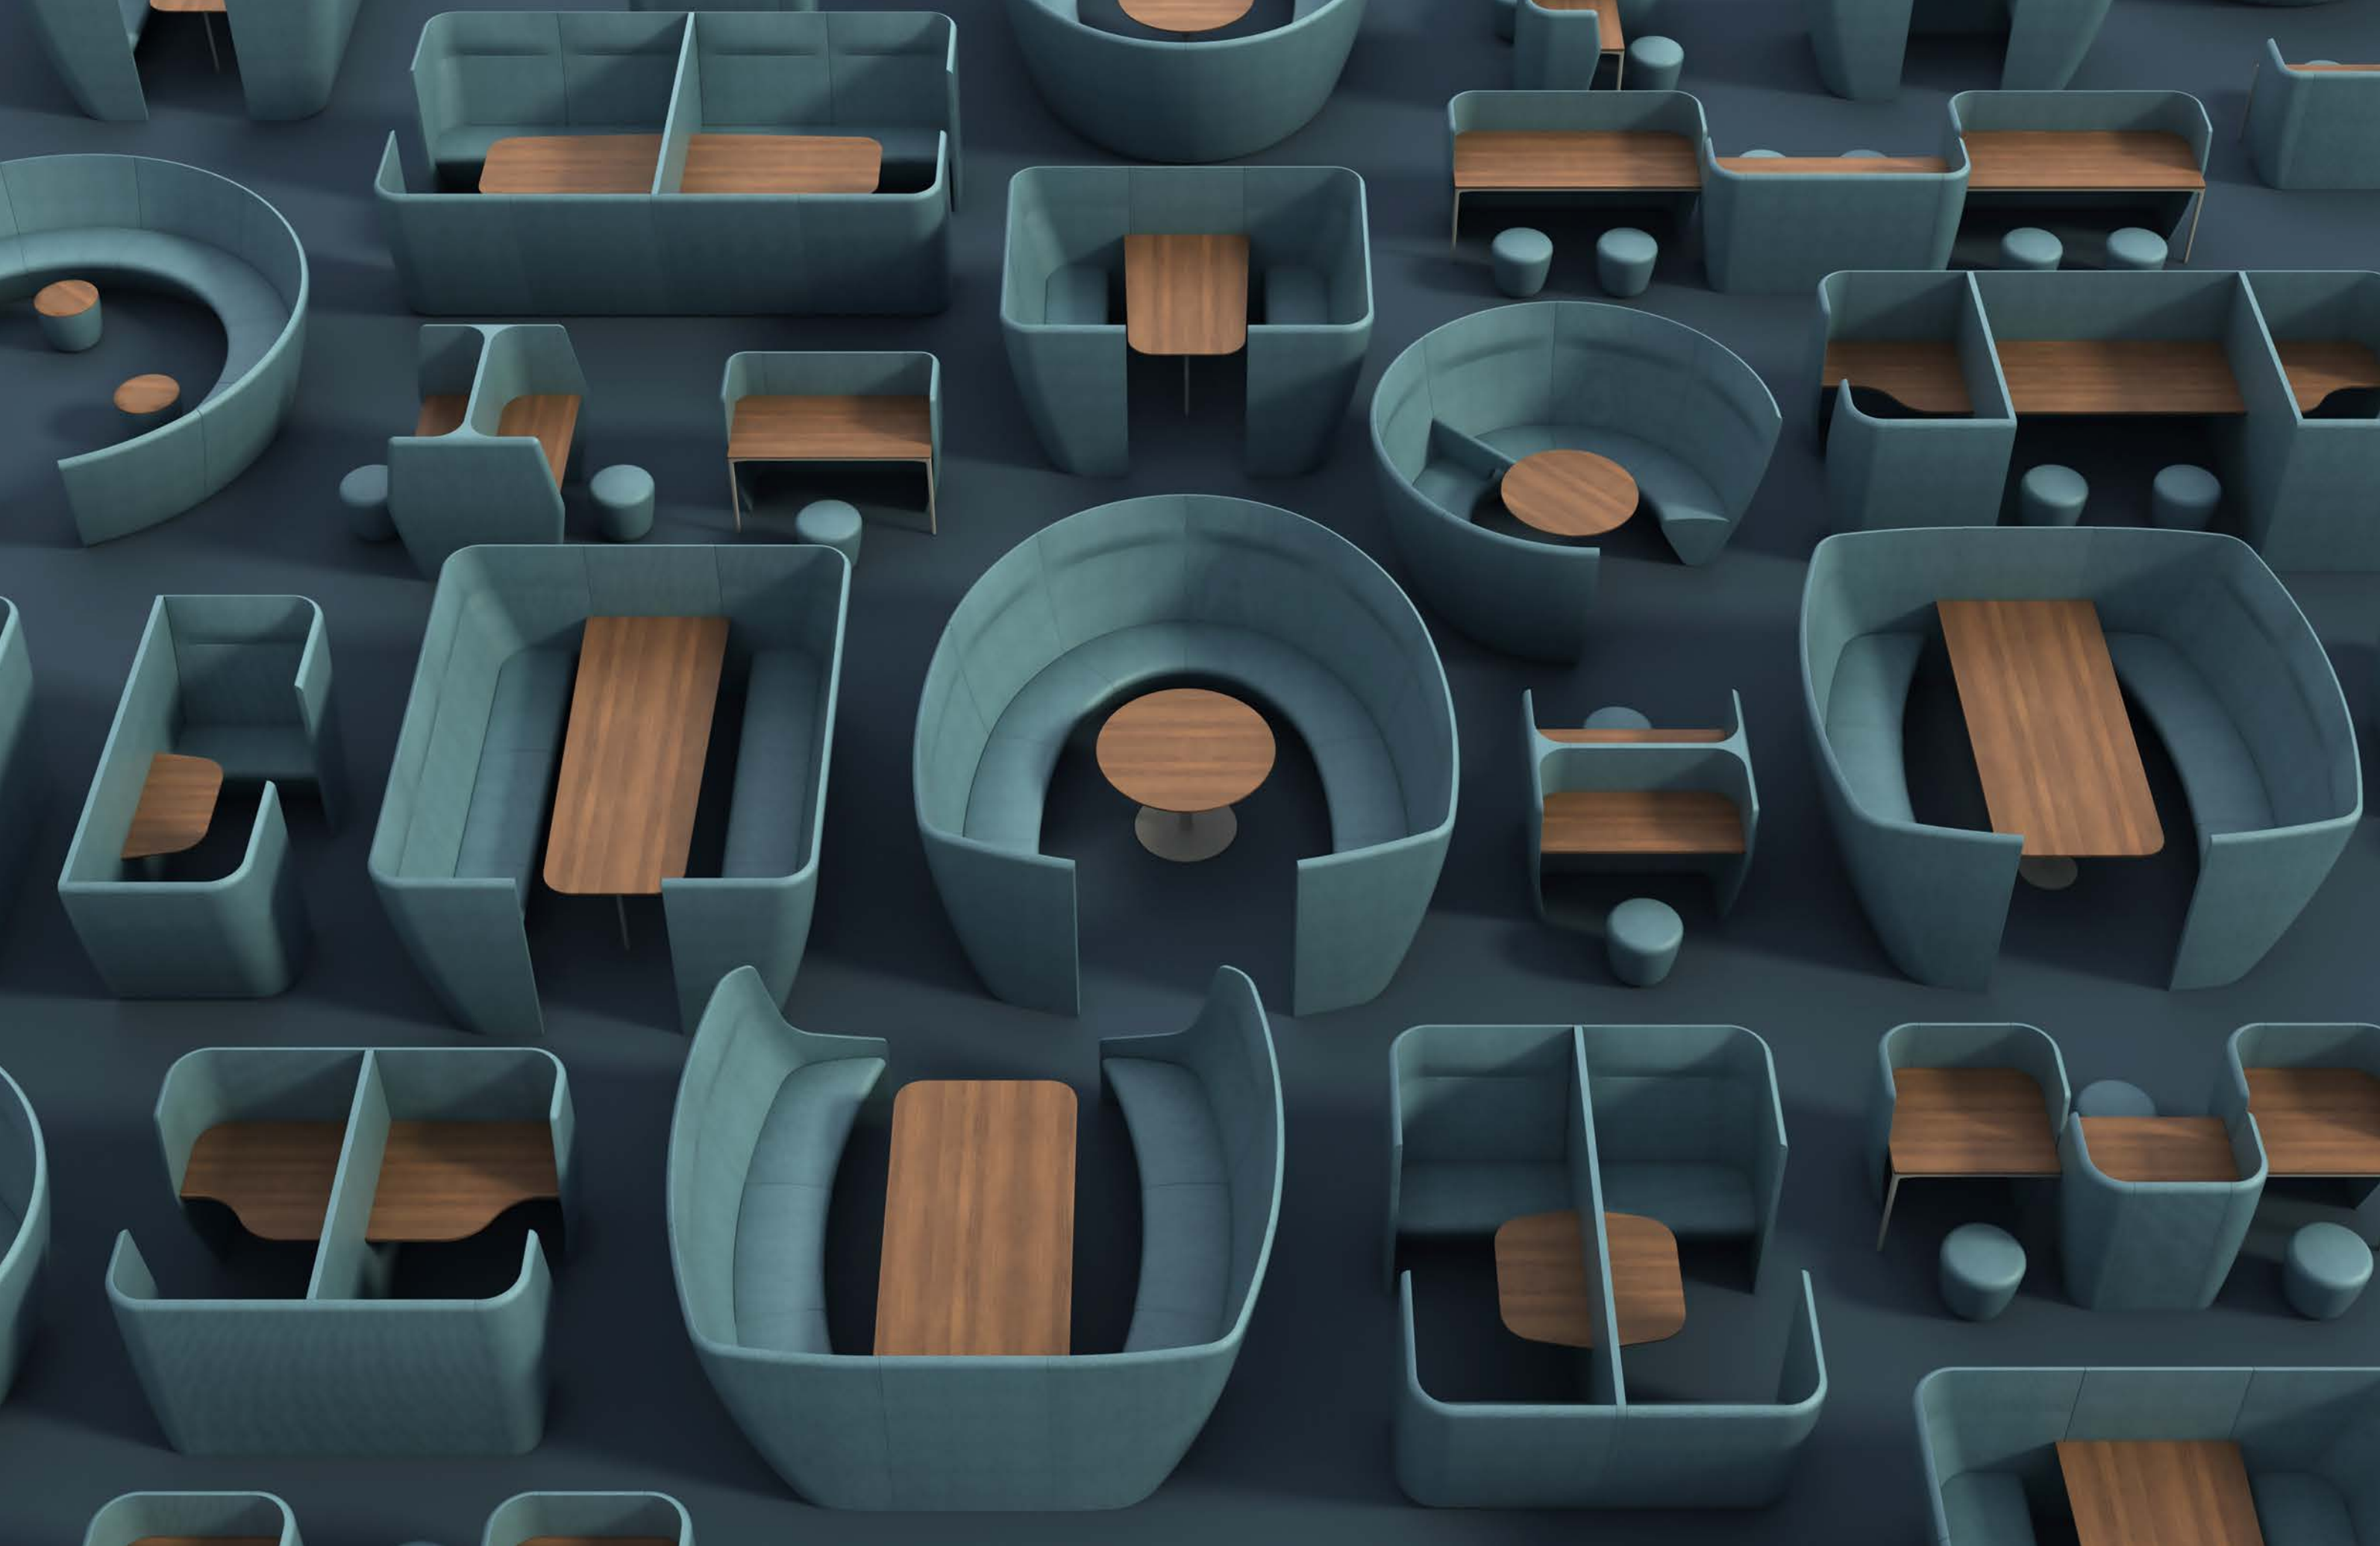

MATERIALS

Beautifully detailed to intuitively combine a wide range of materials, the ATOM family can be tailored to suit any environment and is supported by a product configurator that accommodates thousands of fabric and finish options.

ENDLESS POSSIBILITIES

The ATOM range enables an infinite number of configurations suited to all types of public, education and corporate environments. Allowing the holistic procurement of a considered array of options, permitting organisations to unify the functional adaptability and visual language across all departments with a single furniture range.
